## EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This Office Action is responsive to Applicant's Amendment filed on 6/15/04. Claim 1 has been amended accordingly.

- Claims 1-5 and 7-11 are allowed. 2.
- 3. The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 has been amended to overcome the prior art. Examiner agrees with Applicant's argument regarding claim 1.

The prior art of record does not disclose or render obvious a motivation to provide for an actuator as defined by the limitations of claim 1, including a motor and a wave gear reduction drive disposed with a housing; the motor having a rotational hollow shaft that includes a motor shaft portion; the wave gear reduction drive including a wave generator that includes a rigid cam plate and a wave bearing, and a flexible external gear that includes a cylindrical body, an annular diaphragm and a boss; a first bearing supporting the motor shaft portion in the housing; the wave gear reduction drive end of the rotational shaft supported by the boss via a second bearing; an output shaft mounted to the boss and located inside the hollow rotational shaft and supported in the housing via a cross roller bearing; wherein the cross roller bearing is located in axial alignment with and externally of the diaphragm and the boss; and wherein the cross bearing, the second bearing, the wave bearing, and the first bearing are located in this order from a side of the wave gear reduction drive along the center axis of the housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue Application/Control Number: 10/076,342
